

## HoloPro™ on TV

Dear Sirs,

Please excuse us sending a second NEWSletter in March. This time we have had an error creep into our information.

We published the following announcement in January:

"HoloPro™ on TV

TV producers continue to love HoloPro™ because of its unusual features:

TRANSPARENCY, VIVIDNESS, ANGULAR SELECTIVITY.

Just tune in to Galileo (Pro7), Sundays - Fridays at 7.10 pm or Kriminalreport (NDR), Thursdays at 9.00 pm".

The programme "Das will ich wissen" with Markus Lanz (ZDF 21 November 2008) was also mentioned. However, this programme did not feature a HoloPro™ but another projection screen, as we have now discovered.

We would like to apologise for this incorrect information. All the other content is correct, of course.

Thank you for understanding. We would like to wish you a pleasant working week!

Yours

The pronova Team

**HoloPro™**
