

Böttger Book Shop in Bonn

Pronova sponsored the Videonale12 in Bonn in April. In addition to a welcoming stele in the foyer of the Bonn Art Museum, the installation by the artist Anna Baranowsky at the Böttger Book Shop at the central station was supported. Mrs Baranowsky displayed her installation "Hilferuf" ("Cry for Help").

The projection took place on two 50" HoloPro™ Acryl screens, which were fixed to the existing shop window pane with two suckers. The **great advantage** of the installation is the possibility of converting the existing shop window into a media platform **in the shortest space of time**.

Tripod

For all those who have not yet seen this new, design-orientated stand for 50" screens. At this year's ISE we presented a HoloPro™4 touch screen in this new holder. Convincingly solid!
